FINE ART

# FINE ART

Artist quality colours have historically been the showcase of our profession as colour makers. They bring together the personal involvement and technical excellence of both amateur and professional artists as well as students and graphic artists. Since 1930 Pébéo's history has been written both for, and by artists. It is due to this close collaboration that many Pébéo products have seen the light of day, primary colours, acrylic colours and now the Fragonard colours. Pébéo creates the link between tradition and modernity in fine art.

Product group 18: Arty's

# STUDIO XL OIL

The range offers 64 colours in 37 ml, 180 ml and 200 ml tubes, and 5 colours in 650 ml jars, an economic size particularly suited for larger works. Ideal for working with matter, XL oil dries quickly to the touch and allows for additional coats after 3 days. This year, 7 Dyna and 5 Glaze colours will be introduced. Studio XL oil is the only oil brand offering classic, pastel, bright, Dyna and glaze colours. The originality of this oil range makes it a highly modern oil.

### More info

#### DYNA & GLAZE

The glaze colours are formulated to be transparent and ready to use without adding a medium. As for the Dyna colours, they are formulated from interference pigments that allow the colours to change depending on the angle of light refraction. These colours are compatible with the other colours of the range.

Example of the blue glaze colour

Example of the colour: Dyna Red blue

REF.	PRODUCT	BARCODE	PACK	RRP EACH	DESCRIPTION
	<b>› SOLVENTS</b>				
	<b>Rectified turpentine</b>				
650301	75 ml bottle	316786 650301 8	6		 <p>Obtained by the distillation of certain varieties of pine, it gives a matt aspect which is less accentuated than that achieved with Essence of Petroleum. It is used to thin the first coats of colour.</p> <p><b>CLP 1272-2008</b>            Flammable liquid Category 3            Aspiration Hazard Category 1            Corrosive / Skin Irritation category 2            Skin Sensitisation Category 1            Ocular Damage /Irritation Category 2            Acute Inhalation Toxicity category 4            Chronic Aquatic Toxicity Category 2</p>
650302	245 ml bottle	316786 650302 5	1		
650303	495 ml bottle	316786 650303 2	1		
650304	1 litre bottle	316786 650304 9	1		
	<b>Odourless mineral spirit</b>				
650306	75 ml bottle	316786 650306 3	6		 <p>To dilute oil colours</p> <p><b>CLP 1272-2008</b>            Aspiration Hazard Category 1</p>
650307	245 ml bottle	316786 650307 0	1		
650308	495 ml bottle	316786 650308 7	1		
650309	1 litre bottle	316786 650309 4	1		
	<b>Ess. Oil of pretroleum</b>				
650305	75 ml bottle	316786 650305 6	6		 <p>An excellent diluant, Essence of Oil of Petroleum evaporates much faster than Turpentine and allows a longer working time with the paints. It also makes the colours more matt.</p> <p><b>CLP 1272-2008</b>            Aspiration Hazard Category 1</p>
	<b>› OILS</b>				
	<b>Refined linseed oil</b>				
650101	75 ml bottle	316786 650101 4	6		 <p>Extracted from linseed seeds, this oil is an excellent binder, it makes the paints pleasant to work with, hardens them faster and gives a resistant finish of depth and great beauty.</p>
650102	245 ml bottle	316786 650102 1	1		
650103	495 ml bottle	316786 650103 8	1		
650104	1 litre bottle	316786 650104 5	1		
	<b>Clarified poppy seed oil</b>				
650201	75 ml bottle	316786 650201 1	6		 <p>This oil comes from black poppyseeds and is particularly suitable for grinding light colours. It is more luminous than linseed oil and less siccative and does not yellow at all. This excellent binder gives brilliance without using a siccative.</p>
650202	245 ml bottle	316786 650202 8	1		
650203	495 ml bottle	316786 650203 5	1		
	<b>› MEDIUMS</b>				
	<b>Colourless painting medium</b>				
650601	75 ml bottle	316786 650601 9	6		 <p>Composed of acrylic resin and carthame oil, this medium makes the colour more fluid without thinning it While increasing its brilliance, transparency and depth. It is used progressively to obtain deep and luminous glazes. It dries by evaporation of the solvent and reinforces the adherence of layers. It is non-yellowing.</p>
650602	245 ml bottle	316786 650602 6	1		
650603	495 ml bottle	316786 650603 3	1		
937115	<b>XL colourless painting medium</b> 200 ml tube	316786 937115 7	1		 <p>This medium fluidifies the colour without thinning it, While increasing the transparency and satin finish. Good resistance to yellowing. The colour and viscosity of the medium can evolve in time without changing its characteristic.</p>
	<b>Fragonard gel medium</b>				
650604	75ml bottle	316786 650604 0	6		 <p>With a base of alkyd resins, acrylic and polyamid wax this medium stands out by having more body : it makes the colour more fluid without losing its liveliness. It has great brilliance and transparency and gives an exceptionally brilliant glaze.</p>
650605	245ml bottle	316786 650605 7	1		
650606	495ml bottle	316786 650606 4	1		
	<b>Florentine medium</b>				
650608	60ml tube	316786 650608 8	3		 <p>This satin medium composed of alkyd maleique, acrylic resin and colloidal wax makes the paints harder in weak concentration and more transparent in strong concentration. It is used to obtain a satin finish and stronger thickness than Dutch Medium. Semi paste, it retains the imprint of the stroke and gives a subtle satin glaze.</p>
650622	200ml tube	316786 650622 4	1		

REF.	PRODUCT	BARCODE	PACK	RRP EACH	DESCRIPTION
650610 650623	<b>Dutch medium</b> 60 ml tube 200 ml tube	316786 650610 1 316786 650623 1	3 1		 This brilliant, transparent medium gives exceptional possibilities. It is made from a base of alkyd resins and acrylic and is semi paste, it dries by oxidation and practically never yellows. Used in small amounts it makes the paints richer and gives them a stiffness for precise work. In strong concentration it gives brilliance and a beautiful depth and glazes with a flowing roundness.
650612 650624	<b>Coating medium</b> 60 ml tube 200 ml tube	316786 650612 5 316786 650624 8	3 1		 This thick opaque paste - polyurathane resin, silicate of aluminium hydrate, beeswax - allows work in strong thicknesses and creation in relief. It dries rapidly and makes the colours matt. It can be made supple with the addition of Florentine Medium.
650614 650625	<b>Heavy gel</b> 60 ml tube 200 ml tube	316786 650614 9 316786 650625 5	3 1		 This translucent gel based on alkyd resin, siccative oil and silico aluminate of sodium extends the colour for economy of use. It gives a light satin finish. If used in good measure it gives bright and lively work and a colour which responds to all needs. It can be mixed up to 50% without losing consistency.
650616	<b>Siccative medium</b> 75 ml bottle	316786 650616 3	6		 Similar to Dutch Medium and composed of Chinese wood oil and formophenolic oil it gives very similar possibilities. It speeds the formation of films, improves their resistance and improves drying at depth. It also gives a light amber colouration.
650501	<b>› SICCATIVES</b> <b>Cobalt siccative</b> 75 ml bottle	316786 650501 2	6		 This siccative based on octate of cobalt and zirconium works above all on the surface, it favours fast and efficient strokes. It must be used only for fine coats. Before application it appears to be dark and it must be used with care, excessive use will curl the colour.
650401 650402	<b>Coutraï siccative</b> 75 ml bottle 245 ml bottle	316786 650401 5 316786 650402 2	6 1		 This siccative based on octate of zirconium and calcium works on the surface and the depth. It accelerates drying and allows thick coats to harden evenly. Very powerful, it must be controlled with care. It is colourless and will not alter light colours and is very efficient for blacks and lacquers.
650701 650702 650703	<b>› VARNISH</b> <b>Crystal varnish</b> 75 ml bottle 245 ml bottle 1 litre bottle	316786 650701 6 316786 650702 3 316786 650703 0	6 1 1		 Very limpid, easy to work with and particularly covering, this varnish composed of acrylic resin is very brilliant and has a stronger viscosity than Superfine varnish. The subtlety of the film, the sheen and depth gives a varnish that is ideal for giving value to the strongest forms in a work as well as subtle nuances.
650801 650802 650803 650804 650706 650806	<b>Superfine picture varnish</b> 75 ml bottle 245 ml bottle 495 ml bottle 1 litre bottle 200 ml spray 400 ml spray	316786 650801 3 316786 650802 0 316786 650803 7 316786 650804 4 316786 650706 8 316786 650806 8	6 1 1 1 6 6		 A supple and responsive finishing varnish, very transparent it holds well on the brush and adds a strong brilliance and durability to even poorer works. It makes the colours brilliant and resonant. This varnish dries rapidly and must be applied to a completely dry work (6 months to 1 year). The thermoplastic film allows the possibility to restore.
650809 650810 650811 650707 650807	<b>Satin picture varnish</b> 75 ml bottle 245 ml bottle 495 ml bottle 200 ml spray 400 ml spray	316786 650809 9 316786 650810 5 316786 650811 2 316786 650707 8 316786 650807 5	6 1 1 6 6		 Fast drying varnish, it gives a uniform satin aspect, in between gloss and matt. Composed of acrylic resin and polythene wax it is very easy to set down, transparent and discreet. Shake before use and apply once and in one direction. The thermoplastic film allows the possibility to restore.
650812 650813 650814 650815 650717 650817	<b>Matt picture varnish</b> 75 ml bottle 245 ml bottle 495 ml bottle 1 litre bottle 200 ml spray 400 ml spray	316786 650812 9 316786 650813 6 316786 650814 3 316786 650815 0 316786 650717 7 316786 650817 4	6 1 1 1 6 6		 Matt varnish based on acrylic resin and polyethylene wax, performs well and is easy to set down. Gives works an even matt finish. The strong points of this varnish are its' perfect transparency and strong matt finish. Shake before use, apply once and in one direction. The thermoplastic film allows the possibility to restore.

REF.	PRODUCT	BARCODE	PACK	RRP EACH	DESCRIPTION
650818 650819 *	<b>Dammar picture varnish</b> 75 ml bottle 245 ml bottle	316786 650818 1 316786 650819 8	6 1		 Dammar varnish is a lightly ambered finishing varnish based on natural resin. Bright and responsive, it needs to be applied rigorously. Rich and very covering it holds well and gives generous and very brilliant films which become the most pronounced matt. The lightly gilded colouration gives a pleasing patina to works. Average resistance to photo oxidation.
650820 650821 650822 650724 650824	<b>Retouching varnish</b> 75 ml bottle 245 ml bottle 495 ml bottle 200 ml spray 400 ml spray	316786 650820 4 316786 650821 1 316786 650822 8 316786 650724 5 316786 650824 2	6 1 1 6 6		 A very fine and discreet varnish composed of acrylic resin and plastified polymeric, used in smaller areas, during painting, to correct coats which sometimes accidentally produce an unneeded matt sheen. It unifies the gloss and corrects the problem. It is always used in fine coats and dries rapidly (about 15 minutes) and gives temporary protection. The thermoplastic film allows the possibility to restore.
523250 523200 523300	<b>AUXILIARIES</b> <b>One coat Gesso</b> 500 ml jar 1 litre jar 4 litre jar	316786 523250 6 316786 523200 1 316786 523300 8	1 1 1		 A very covering white finish for preparing surfaces to be painted. It is applied evenly and not too thickly. It dries rapidly and leaves a light matt surface which gives a key to coats subsequently applied, whether oil or acrylic. <small>N.B. : Other acrylic auxiliaries for the preparation of painting surfaces on pages 23, 28 to 30.</small>
650315 650316	<b>Brush cleaner</b> 75 ml bottle 245 ml bottle	316786 650315 5 316786 650316 2	6 1		 This cleaner is suitable for use with all painting utensils. It dissolves oil and varnish even when dry and it retains the suppleness and form of brushes.
650310 650311	<b>Universal paint remover</b> 75 ml bottle 245 ml bottle	316786 650310 0 316786 650311 7	6 1		 This strong solvent strips dried-on oil, acrylic and other material from all painting tools. Very efficient, it works in 15-30 minutes and can be rinsed off in water. Rinse well in the event of contact with the skin.

## More info

### EACH MEDIUM HAS A SPECIFIC ROLE.

Added to the paint, while enriching the paste, it modifies its structure, brilliance and transparency.  
75, 245 and 495ml bottles or 60 and 200ml tubes depending on the product.

PROPERTIES	Thinner : mineral spirit	Fluid consistency	Jellified consistency	Paste consistency	Becomes fluid without thinning	Thickens the paste	Increases gloss	Reduces gloss	Increases transparency	Accelerates drying	Remark
<b>Colourless painting medium</b> (acrylic resin and safflower oil)	●	●			●		●		●		
<b>Fragonard gel medium</b> (alkyd and acrylic resins)	●		●		●		●		●		(1)
<b>Florentine medium</b> (alkyd and acrylic resins)	●			●	●			●	●		
<b>Heavy gel</b> (alkyd resin, siccative oil, hydrated silicate of alumina)	●			●	●				●	●	(2)
<b>Siccative medium</b> (metal salts, acrylic and formophenolic resins)	●	●			●		●		●	●	(3)
<b>Dutch medium</b> (alkyd and acrylic resins, safflower oil)	●			●	●		●		●		
<b>Coating medium</b> (polyurethane resin, hydrated silicate of alumina)	●			●		●					(4)

#### • Strong property :

- (1) Becomes liquid when stirred.
- (2) To obtain a more economical paint, with the same consistency (mix up to 50%).
- (3) Produces a light amber colour.
- (4) Used alone without mixing to create large reliefs, it is then painted.

# Fragonard

## Extra fine Oil

### FRAGONARD - A UNIVERSE OF COLOURS

#### FOR DEMANDING ARTISTS.

The Fragonard Extra Fine Oil colour range consists of 104 colours in 37ml tubes, a selection of 39 colours (36 monopigments and 3 primaries) in 80 ml tubes, and 20 basic colours in 200 ml tubes. The Fragonard Oils are made from linseed, poppy seed and sunflower oils. This composition has been chosen following numerous specialist laboratory tests undertaken to guarantee the best compromise between yellowing and UV ageing. All the pastes are ground many times on tri-rollers to guarantee their extra fine quality. The extreme purity of the pigments used guarantees their perfect mixability. This range offers a very good balance between opaque and transparent colours.

# STUDIO ACRYLICS

## STUDIO HIGH VISCOSITY ACRYLIC

Studio High Viscosity Acrylic is a satin finish acrylic developed with the same precision as the extra-fine acrylics. It is particularly suited to work in dimension, because of its thick consistency. It retains the brush or painting knife mark and can be used pure or with the Pébéo Studio Acrylic auxiliaries, depending on the desired effect. Very adherent and indelible once dry.

## STUDIO FLUID ACRYLIC

Studio Fluid Acrylic is a satin finish acrylic. Because of its fluid consistency, it is particularly suited for application with a brush. Very adherent and indelible once dry, it is suitable for most surfaces. It can be used pure or with the Pebeo Studio Acrylic auxiliaries, depending on the desired effect.

The formula of the High Viscosity and Fluid Studio Acrylic pastes is free of heavy metals.

REF.	PRODUCT	BARCODE	PACK	RRP EACH	DESCRIPTION
524110 524102 524122 524142	<b>&gt; GESSO</b> <b>Gesso Studio</b> 250 ml tube	316786 524110 2	3		 White coating for the preparation of the surfaces to be painted. Its viscosity and titanium white concentration makes it particularly covering. It is applied on a clean and non-greasy surface. Dries quickly and has a light matt finish, which improves the adhesion of the acrylic or oil layers.
	500 ml jar	316786 524100 3	1		
	1 litre jar	316786 524120 1	1		
	4 litres jar	316786 524140 9	1		
524111 524135	<b>Black Gesso Studio</b> 250 ml tube	316786 524111 9	3		 A matt and covering coating for preparing surfaces to be painted. It is applied on a clean and non-greasy surface.
500 ml jar	316786 524135 5	1			
524105	<b>Grey Gesso Studio</b> 500 ml jar	316786 524105 8	1		
524129 524130 524150 524160	<b>&gt; MODELING PASTE</b> <b>Modeling paste Studio</b> 100 ml tube	316786 524129 4	3		 Opaque paste of heavy texture to create dimension and make coatings. Can be applied with a painting knife and mixed with the moist colour; when mixed, the colour is slightly lightened. It retains the imprint of the tool, can be sculpted, painted and rubbed down once dry. Keeps its volume perfectly and does not crack after drying. It has a matt finish.
	250 ml tube	316786 524130 0	3		
	500 ml jar	316786 524150 8	1		
	1000 ml jar	316786 524160 7	1		
831115 169115	<b>Modeling paste Studio High viscosity</b> 100 ml tube	316786 831115 4	3		 Heavy textured opaque paste to create dimensions and coatings. Can be used pure or mixed with the Studio acrylics colours.
250 ml jar	316786 169115 4	1			
524440	<b>Crackling Effect Modeling paste</b> 1 tubes 100ml Step 1 + 1 tube 250ml Step 2	316786 524440 0	1		 To increase the adherence of the modelling and facilitate the appearance of cracks, it is strongly recommended to prepare the surface with the Step 1 Under Coat medium. The Crackling Effect Modelling Paste (step 2), of a paste-like consistency, can be applied with a painting knife. It can be used pure or mixed with Studio Acrylics colours (75 % modelling / 25% colour).
524240 524250 524260 524270 524280	<b>&gt; BINDEX &amp; GELS</b> <b>Bindex Studio</b> 100 ml tube	316786 524240 6	3		 Non-yellowing liquid binder for the preparation of the colours. Can be used for collages and inlays and mixed with the colours to give them depth and brightness. Translucent and indelible once dry, gives a flexible and satin film. Keep out of cold.
	250 ml tube	316786 524250 5	3		
	500 ml jar	316786 524260 4	1		
	1000 ml jar	316786 524270 3	1		
	4 litres jar	316786 524280 2	1		
524241 524242 524243	<b>Gloss Bindex Studio Acrylics binder DYNA, 100 ml tube</b> Dyna Violet	316786 524241 3	3		 Fluid acrylic binders for collages and dilution of colours. They are formulated with interference pigments that allow applications to change colour depending on the angle of light.
Dyna Green	316786 524242 0	3			
Dyna Blue	316786 524243 7	3			
524170 524180	<b>Studio Gloss Gel</b> 100 ml tube	316786 524170 6	3		 Gloss or matt gel, non-yellowing, can be mixed with the paint to increase the transparency, volume and drying time. Ideal for collages and inlays. Gloss or matt finish, translucent after drying.
250 ml tube	316786 524180 5	3			
524210 524220	<b>Studio Matt Gel</b> 100 ml tube	316786 524210 9	3		
250 ml tube	316786 524220 8	3			
832112 832113 832114 832116 832117	<b>Phosphorescent Gel, 100 ml tube</b> Green	316786 832112 2	3		 The phosphorescent gels absorb the natural or artificial light and re-emit it in the darkness. These gels are slightly tinted so that the colours may be recognized in daylight, with the exception of the untinted green phosphorescent gel. For best results, apply the gels thickly, with a painting knife.
	Turquoise	316786 832113 9	3

# POP ART

## Acrylic

The Pop Art Acrylic is a high viscosity student grade quality acrylic. The product quality and the large opening of the jar make the paint suited for generous applications on large surfaces using large brushes and spalters. Versatile, the paste can be worked with a brush or a painting knife. The packaging is trendy as well as the product name; high transparency of the jar and handle on the cover.

# ARTIST ACRYLICS

## Extra fine

Pébéo Artist Acrylics is a performing extra fine acrylic developed following the latest developments in modern chemistry. This product has been designed in conjunction with artists from around the world to make an acrylic with a high pigment concentration, versatile for easy application with both brushes and painting knives. Its 79 bright and intense colours offer a satin gloss finish and excellent resistance to light and aging.

Product group 4

REF.	PRODUCT	BARCODE	PACK	RRP EACH	DESCRIPTION
	<b>&gt; GESSO</b>				
	<b>One coat Gesso</b>				
523250	500 ml jar	316786 523250 6	1		 <p>A very covering white finish for preparing surfaces to be painted. It is applied evenly and not too thickly. It dries rapidly and leaves a light matt surface which gives a key to coats subsequently applied, whether oil or acrylic.</p>
523200	1 litre jar	316786 523200 1	1		
523300	4 litre jar	316786 523300 8	1		
	<b>Transparent GESSO</b>				
523850	500 ml jar	316786 523850 8	1		 <p>A transparent coating used for preparing the surfaces to be painted. It is applied on a clean and nongreasy surface. Dries quickly and has a light matt finish, which improves the adhesion of the layers of paint.</p>
523800	1 litre jar	316786 523800 3	1		
	<b>&gt; MODELING PASTE</b>				
	<b>Heavy modeling paste</b>				
521900	500 ml jar	316786 521900 2	1		 <p>Opaque paste with a heavy texture for relief works and impasto. It is applied with a painting knife and is mixed with the colour when moist. It retains the imprint of the tool and can be sculpted and painted when dry. Perfectly retains its volume and does not crack. Matt finish.</p>
521950	1 litre jar	316786 521950 7	1		
	<b>Light modeling paste</b>				
521800	500 ml jar	316786 521800 5	1		 <p>A light opaque paste used to create dimension and make coatings. Can be applied pure or mixed with colour. Keeps its volume perfectly and does not crack after drying.</p>
521850	1 litre jar	316786 521850 0	1		
	<b>&gt; BINDER</b>				
	<b>Gloss Bindex</b>				
523600	500 ml jar	316786 523600 9	1		 <p>Non-yellowing binder used to prepare acrylic colours. Can be used as a binder for collages and material effects. Translucent and indelible it gives a supple satin film. Conserves the covering of the gel.</p>
523100	1 litre jar	316786 523100 4	1		
523150	4 litre jar	316786 523150 9	1		
	<b>Matt Bindex</b>				
523700	500 ml jar	316786 523700 6	1		 <p>Non-yellowing binder used to prepare acrylic colours. Recommended for collages and inlays. Once dry, it becomes translucent and matt and is indelible. Can be diluted with water. Keep out of the cold.</p>
523710	1 litre jar	316786 523710 5	1		
523720	4 litre jar	316786 523720 4	1		
	<b>&gt; MEDIUMS</b>				
	<b>Gloss medium</b>				
520800	75 ml bottle	316786 520800 6	6		 <p>Glossy polyurethane acrylic medium, non-yellowing and transparent when dry it boosts the shine of the colours. Gloss finish. Particularly recommended for glazes.</p>
520900	250 ml bottle	316786 520900 3	1		
520950	500 ml bottle	316786 520950 8	1		
520960	1 litre bottle	316786 520960 7	1		
	<b>Matt medium</b>				
521000	75 ml bottle	316786 521000 9	6		 <p>Matt polyurethane acrylic medium, brings a degree of matt which supports the density of the colour. Mix with gloss medium for a satin finish. Non-yellowing and translucent.</p>
521100	250 ml bottle	316786 521100 6	1		
521150	500 ml bottle	316786 521150 1	1		
521160	1 litre bottle	316786 521160 0	1

FINE ART

REF.	PRODUCT	BARCODE	PACK	RRP EACH	DESCRIPTION
	<b>&gt; GELS</b>				
	<b>Gloss gel</b>				
521330	250 ml jar	316786 521330 7	1		 <p>The identical consistency to Pébéo Acrylic Extra Fine, mix with the colour to improve depth and transparency. Ideal for collages and inlays. Gloss finish which is very transparent after drying.</p>
521300	500 ml jar	316786 521300 0	1		
521350	1 litre jar	316786 521350 5	1		
	<b>Matt gel</b>				
521530	250 ml jar	316786 521530 1	1		 <p>Identical characteristics to Gloss Gel with a transparent matt finish after drying.</p>
521500	500 ml jar	316786 521500 4	1		
	<b>Heavy gel</b>				
521730	250 ml jar	316786 521620 9	1		 <p>Dense gel, ad to the colours, it allows work in thick layers. Opalescent and non- yellowing it can be added to the colour in a mix of up to 50%, for economy. It extends the drying time.</p>
521700	500 ml jar	316786 521700 8	1		
521750	1 litre jar	316786 521750 3	1		
	<b>Gold interference gel</b>				
522000	60 ml tube	316786 522000 8	3		 <p>Can be used pure or mixed with colours to obtain gold iridescent reflections. Dilute with water or fluidize with a medium.</p>
522110	250 ml jar	316786 522110 4	1		
522150	500 ml jar	316786 522150 0	1		
	<b>Interference gel</b>				
522050	60 ml tube	316786 522050 3	3		 <p>Can be used pure or mixed with colours to obtain iridescent reflections. Dilute with water or fluidize with a medium.</p>
	<b>Diffuser</b>				
523050	75 ml bottle	316786 523050 2	6		 <p>Facilitates the dilution and dispersion of acrylic colours. Ideal for airbrush and watercolour work.</p>
	<b>Retarder</b>				
522900	37ml tube	316786 522900 1	5		 <p>For slowing down the drying time, mix up to 10% Retarder with the colour. Do not use outside or for works that will be exposed to humid conditions.</p>
	<b>&gt; MORTARS</b>				
	<b>Black mica mortar</b>				
522700	250 ml jar	316786 522700 7	1		 <p>Made from a mixture of acrylic polymer and iron oxide mica, it gives a metallic effect. It works well with knife or brush. Can be diluted with water and thinned with gels or mediums.</p>
522800	500 ml jar	316786 522800 4	1		
	<b>Pumice stone mortar</b>				
523400	250 ml jar	316786 523400 5	1		 <p>Made from acrylic polymers and finely crushed pumice stone, it gives a finely grained effect. It can be used as is or mixed with acrylic colours and retain its' metallic aspect. Can be diluted with water, thinned with gels and mediums. Semi matt finish.</p>
523500	500 ml jar	316786 523500 2	1		
	<b>Raw sand mortar</b>				
522500	250 ml jar	316786 522500 3	1		 <p>Made from acrylic polymer and silica, it gives a thick and granular consistency. Preferably used with a knife. Use as is or mixed with colour. It gives grainy effects. Dilute with water and Bindex. Semi matt finish.</p>
522600	500 ml jar	316786 522600 0	1		
	<b>Crystal mortar</b>				
522300	250 ml jar	316786 522300 9	1		 <p>Made from a mixture of acrylic polymer and quartz crystals, it is used to create transparent and granular materials which react with the light. It can be used as is, or in gradations with colour. Preferably use with transparent colours. It is thicker and heavier than other mortars and can be mixed with Bindex to improve its' adherence to the painting surface. Gloss finish.</p>
522400	500 ml jar	316786 522400 6	1

REF.	PRODUCT	BARCODE	PACK	RRP EACH	DESCRIPTION
	<b>&gt; VARNISHES</b>				
	<b>Gloss varnish</b>				
520100	75 ml bottle	316786 520100 7	6		 <p>Non-yellowing and particularly transparent varnish. It gives a perfectly tight film, supple and indelible, as well as a very uniform gloss.</p>
520200	250 ml bottle	316786 520200 4	1		
520250	500 ml bottle	316786 520250 9	1		
520300	1 litre bottle	316786 520300 1	1		
	<b>Matt varnish</b>				
520400	75 ml bottle	316786 520400 8	6		 <p>Non-yellowing opalescent varnish which gives a covering film which is perfectly tight, supple and indelible. Matt finish.</p>
520500	250 ml bottle	316786 520500 5	1		
520550	500 ml bottle	316786 520550 0	1		
520560	1 litre bottle	316786 520560 9	1		
	<b>Satinated varnish</b>				
520150	75 ml bottle	316786 520150 2	6		 <p>A non-yellowing varnish. Once applied, it gives a perfectly tight, supple and indelible film.</p>
520180	250 ml bottle	316786 520180 9	1		
	<b>Solvent based gloss varnish</b>				
520230	200 ml spray	316786 520230 1	6		 <p>A supple and responsive finishing varnish, very transparent it holds well on the brush and adds a strong brilliance and durability to even poorer works. It makes the colours brilliant and resonant. This varnish dries rapidly and must be applied to a completely dry work (6 months to 1 year). The thermoplastic film allows the possibility to restore.</p>
520210	400 ml spray	316786 520210 3	6		
	<b>Solvent based matt varnish</b>				
520225	200 ml spray	316786 520225 7	6		 <p>Matt varnish based on acrylic resin and polyethylene wax, performs well and is easy to set down. Gives works an even matt finish. The strong points of this varnish are its' perfect transparency and strong matt finish. Shake before use, apply once and in one direction. The thermoplastic film allows the possibility to restore.</p>
520220	400 ml spray	316786 520220 2	6		
	<b>Solvent based satin varnish</b>				
520235	200 ml spray	316786 520235 6	6		 <p>Fast drying varnish, it gives a uniform satin aspect, in between gloss and matt. Composed of acrylic resin and polythene wax it is very easy to set down, transparent and discreet. Shake before use and apply once and in one direction. The thermoplastic film allows the possibility to restore.</p>
520215	400 ml spray	316786 520215 8	6		
	<b>Solvent based UV varnish</b>				
520730	75 ml bottle	316786 520730 6	6		 <p>Particularly recommended for protecting works exposed to the exterior. Imperious and non-yellowing, it filters UV light. Satin finish. Once dry it can be removed with petroleum or white spirit without altering the acrylic colour.</p>
520700	250 ml bottle	316786 520700 9	1		
520750	500 ml bottle	316786 520750 4	1		
520760	1 litre bottle	316786 520760 3	1		
	<b>&gt; AUXILIARIES</b>				
	<b>Brush cleaner</b>				
650315	75 ml bottle	316786 650315 5	6		 <p>This cleaner is suitable for use with all painting utensils. It dissolves oil and varnish even when dry and it retains the suppleness and form of brushes.</p>
650316	245 ml bottle	316786 650316 2	1		
	<b>Universal paint remover</b>				
650310	75 ml bottle	316786 650310 0	6		 <p>This strong solvent strips dried on oil, acrylic and other material from all painting tools. Very efficient, it works in 15-30 minutes and can be rinsed off in water. Rinse well in the event of contact with the skin.</p>
650311	245 ml bottle	316786 650311 7	1		
650313	495 ml bottle <small>discontinued</small>	316786 650313 1	1		

# ARTIST ACRYLICS

## Liquid ink

Artist Acrylics Liquid has been specially designed for airbrush work and for use with graphic instruments. It is an ink made from acrylic pigments and is very easy to use. Its surprising fluidity and the fineness and dispersion of the pigments assures ease of use and precision whichever tool is used.

# MAT PUB

Highly pigmented acrylic paint for exterior frescoes. Mat Pub combines the qualities of traditional gouache and acrylic colour and is predominantly used by decorators, graphic and lettering artists. This creamy acrylic has excellent light resistance and remains supple when dry which allows it to be used on all exterior surfaces.

# GOUACHE T7

## Extra fine

Pébéo T7 is very opaque and rich in pigments and is a very high quality extra fine gouache. This fine paste is both supple and adherent and allows delicate work on a variety of surfaces. The range consists of 74 matt, velvety colours. Based on organic mineral pigments, the colour is covering, dense and luminous and gives an excellent veneer.

# WATERCOLOURS

Designed in the craftsman tradition of Pebeo watercolours, these 28 colours have been carefully selected to suit the amateur watercolourist. The colours are very easy to mix and have a depth of tone and transparency which does not disappear as the colour dries.

# Fragonard

## Extra Fine Watercolours

3 series in 3 packagings with 60 colours enriched with honey for a sticky texture and to aid dilution with water. The colours are intense and transparent with excellent resistance to light. Fragonard Extra Fine Watercolour is a range based mainly on organic, mineral monopigments with excellent light resistance even for those colours traditionally known to be very susceptible, such as the madders and the carmines.

## More info

Made in paste and then poured into each half pan, Fragonard artists' watercolour follows a specific 3 stage drying process. This method of manufacture allows the immediate dilution of the colour.

# PASTELS & CHARCOALS

**Pastels:** Pebeo's oil pastels can be used on their own or diluted with turpentine. Our selection of soft pastels is best used on paper and is accessible to amateur artists for drawing. Oil pastels or soft pastels allow for spontaneity in gesture.

**Charcoals:** Pebeo natural charcoals are made in the traditional craft way from carbonised wood and in collaboration with design professionals. Indispensable tools for drawing, Pébéo soft charcoals enable tracing soft and regular lines of a deep black.

## watercolours, gouache, ink and pastels

Product group 4

REF.	PRODUCT	BARCODE	PACK	RRP EACH	DESCRIPTION
349000 316000 319000	<b>&gt; GRAPHIC INDIA INK</b> 45 ml bottle 250 ml bottle 1 litre bottle	316786 349000 7 316786 316000 9 316786 319000 6	5 1 1		 Black, opaque and with a satin finish, India Ink is a carbon black with good light strength. It is fluid but does not drip and can be diluted with water for washes. Once dry it is water resistant and cannot be rubbed out.
033000 372000	<b>&gt; DRAWING GUM</b> 45 ml bottle 250 ml bottle	316786 033000 9 316786 372000 5	5 1		 Peelable rubber solution used to keep areas colour free when using ink, watercolour or gouache. Rubbed off when the colour is dry to reveal the plain paper beneath.
650550*	<b>&gt; OX GALL</b> 75 ml bottle	316786 650550 0	6		 Ox Gall is used with gouaches. Several drops added to the colour are enough to improve the veneer as well as the adherence to water resistant surfaces such as plastic and acetate.
213000* 239000* 244000	<b>&gt; CRYSTAL VARNISH</b> 75 ml bottle 245 ml bottle Metal can 1 litre	316786 213000 3 316786 239000 1 316786 244000 3	6 1 1		 A solvent based varnish which is thick and very covering. Once dry, it forms a particularly brilliant film which reinforces the depth of the colour. Clean brushes with Essence of Petroleum.
582100 246000* 250000* 582020 582120	<b>&gt; SURFINE GOUACHE VARNISH</b> 75 ml bottle 245 ml bottle 495 ml bottle 200 ml spray 400 ml spray	316786 582100 7 316786 246000 1 316786 250000 4 316786 582020 8 316786 582120 5	6 1 1 6 6		 Based on a non-yellowing acrylic and giving a fine protective satin film. It enhances the sheen of the colours. Clean brushes with Essence of Petroleum.
603701 261000 260000 267000	<b>&gt; WATERBASED GOUACHE VARNISH</b> 45 ml bottle 250 ml bottle 500 ml bottle 1 litre bottle	316786 603701 8 316786 261000 0 316786 260000 1 316786 267000 4	5 1 1 1		 Apply with a brush over dry colour. Water based and odourless it gives a satin finish and a durable protection to work. CE compliant.
752001*	<b>&gt; WATERCOLOUR VARNISH</b> 75 ml bottle	316786 372001 4	6		 Allows you to protect your work without altering the shades. Non-yellowing.
571100 571140 571120	<b>&gt; PASTEL AND CHARCOALS FIXATIVE</b> 75 ml bottle 200 ml spray 400 ml spray	316786 571100 1 316786 571140 7 316786 571120 9	6 6 6		 Colourless and acrylic based, non-yellowing. Fixes the colour without altering the appearance.

# Fragonard

## Pigments

Amongst the thousands of pigments and possible combinations, we are proposing an essential selection of 30 very pure monopigments with excellent light fastness resistance. They are properly distributed over the whole colour spectrum and allow to obtain, by thorough grinding, vivid monopigment colours.

# CANVAS

## on rolls

The quality and aspect of a canvas is strongly dependant on the origin of the fabric and the treatment that it has been subjected to, all these points will have an influence on the regularity and strength of the canvas.

The weave gives the canvas it's structure which in turn determines it's resistance and pattern. Pébéo assures the homogeneity of the canvas, that is to say an aspect and resistance identical in warp and weave; to achieve this, the weaving is done with the same number of threads per centimetre in length and width. All Pébéo canvasses are thus guaranteed.

### Product group 7

REF.	PRODUCT	BARCODE	PACK	RRP EACH	DESCRIPTION
	<b>› EXPERT LINEN</b>				
792221	Roll of 10 m x 2,14 m, universal coating	316786 792221 4	1		Pebeos' 'expert' linen canvasses are made from 100% spun linen fibre for greater regularity and strength. The research laboratory has formulated a gumming primer which guarantees the stability of the canvas. Their suppleness, strength and stability take away the cracking and crumbling which are a feature of traditional primers. (Weight of 340 gr./m <sup>2</sup> )
792222	Roll of 5 m x 2,14 m, universal coating	316786 792222 1	1		
792229*	Roll of 10 m x 2,24 m, unbleached canvas	316786 792229 0	1		
	<b>› STANDARD LINEN</b>				
792721	Roll of 10 m x 2,14 m, universal coating	316786 792721 9	1		Linen remains the traditional canvas 'par excellence'. The principle qualities are strength and longevity. (Weight of 330 gr./m <sup>2</sup> )
792722	Roll of 5 m x 2,14 m, universal coating	316786 792722 6	1		
	<b>› ARIANE CANVAS</b>				
792421	Roll of 10 m x 2,14 m, universal coating. Tinted linen.	316786 792421 8	1		An excellent value for money product, this sturdy canvas is unaffected by hygrometric variations. (Weight of 440 gr./m <sup>2</sup> )
792422	Roll of 5 m x 2,14 m, universal coating. Tinted linen.	316786 792422 5	1		
792429	Roll of 10 x 2,22 m, unbleached canvas	316786 792429 4	1		
792423	Roll of 2,14 x 0,70 m Ariane canvas	316786 792423 2	4		
792424	Roll of 2,14 x 1,40 m Ariane canvas	316786 792424 9	4		
	<b>› COTTON CANVAS</b>				
792521	Roll of 10 m x 2,14 m, universal coating linen tinted cotton	316786 792521 5	1		Cotton canvas lends itself to all painting techniques. Pébéo cotton canvas has a regular appearance without knots. The strength is due to the weight (Weight of 400 gr./m <sup>2</sup> )
792522	Roll of 5 m x 2,14 m, universal coating linen tinted cotton.	316786 792522 2	1		
792529	Roll of 10 x 2,22 m, unbleached canvas	316786 792529 1	1

Roll of 2,14 x 0,70 m Ariane canvas

# CHASSIS

## Lin expert *Fragonard*

Pebeo canvasses are nailed following ancient rules (weight of 340 gr./m<sup>2</sup>). Working from the centre outwards to avoid the formation of folds and to guarantee a regular and uniform tension. The folds at the back of the canvas are important to facilitate successive mounting and demounting. Pebeo canvasses are delivered shrinkwrapped and with a key to allow tension adjustment.

## More info

### FRAGONARD EXPERT LINEN

The Fragonard expert linen stretcher is mounted with 100% linen canvas. This canvas is weaved with pre-washed long fibres, which gives it its clean look and very good regularity. The Pébéo research laboratory has formulated a new type of coating, guaranteeing very good stability of the canvas, good adhesion and total protection of the fibres: its flexibility, strength and waterproofness will avoid the appearance of cracks and the crumbling-away, which characterizes traditional skin glue based coatings. Two layers of this coating are successively applied. Two layers of a white semi-absorbent coating rich in titanium, offers an excellent adhesive surface.

The Fragonard expert linen canvas mounted stretchers are offered in 5 versions:

- 4 types of grain fineness with white primer: extra-fine, fine, medium and strong.
- 1 version of medium grain without white primer to allow painting on a raw canvas.

The painting surface is an important element in order for the artist's work to be fully expressed. Because of that, we offer the artists quality canvasses with different grain fineness allowing for all types of paints.

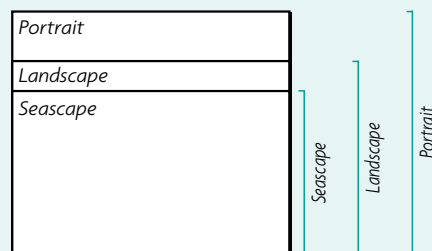

The artist has the choice between these different types of grain depending on the technique and effect desired. If the artist wants to work in fine layers, he will be interested by the extra-fine grain quality. If the fineness of the painting surface doesn't depend on the technique or if he wants to use the grain to give dimensional effects to his painting, he will use the medium grain or even the strong one. This choice will be done in accordance with the sensitivity of the artist towards the painting surface and the contact of the brush on the clean surface.

## linen stretchers

Linen is the traditional fabric of excellence. Its main natural qualities are its strength, stability and longevity, which made it the painting base that replaced wood. The quality of a canvas depends on the choice of the threads. To obtain a canvas of regular appearance, you need to use quality thread. The best quality threads are from long fibres, which are more regular, homogeneous and solid. Apart from the long fibres, the thread selected by Pébéo is small in diameter (Nm 15) and that increases its cleanliness. Pébéo offers a homogeneous and strong linen canvas and to attain that, the weaving is done so that the canvas has an equal number of treads (12 in warp and 12 in weft). The coating of the Pébéo linen is done industrially (very regular) with modern formulas: the impregnation layer that does not crack (contrary to skin glue) and stabilizes the canvas, 2 white finishing layers that allow the canvasses to accept all types of paint.

# COTTON

## canvas stretchers

The COTTON canvas, along with the linen canvas, has been used for many years by artists. It is of regular appearance and its strength is due to the diameter of the thread used and the density of the weaving. With a Nm 14 thread and weaving 14 threads in warp and 12 in weft, the Pebeo COTTON canvas is a heavy canvas, making it more solid than the others on the market. The impregnation layer applied on the cotton canvas has been studied to accept all types of paint and obtain great adherence.

# 3D STRETCHERS

## Cotton and Linen

These 3D stretchers are recommended to work in multitych. These stretchers are more voluminous and made of paulownia wood which is lighter than pine.

### 3D COTTON AND BLACK 3D COTTON

The canvas used for these 3D stretchers is the same as the one used for the cotton canvas stretchers (400 gr./m<sup>2</sup>). The originality of these 3D stretchers is that they have thick sides that can be painted and they give dimension to the work. Black canvas gives great colours contrast.

### 3D NATURAL LINEN

The 3D stretchers are also available with natural linen of 330gr/m<sup>2</sup>. This canvas is primed with a colourless coating that makes it stiff and waterproof.

# ARIANE

## canvas stretchers

The Ariane canvas: This canvas owes its success to the great mechanical qualities and its aspect. The thread used, of a diameter close to the one used with linen, is very regular and more resistant. Additionally, it is insensitive to water and to most chemical products. The Ariane canvas is a very resistant and stable canvas. By conferring the weaving to an ISO 9000 company, Pebeo guarantees the regularity and cleanness of this canvas.

The impregnation layer applied on the Ariane canvas has been studied to accept all types of paint and obtain great adherence.

# SETASILK

Lively and intense colours that make all the classic silk painting techniques available to all. Made from resins and finely dispersed pigments, Setasilk colours are easily iron fixed. Colours intermix easily and offer a palette of rich and luminous tones.

> Water based Gutta

FABRIC COLOURS

# Silk Painting auxiliaries

Product group 3

REF.	PRODUCT	BARCODE	PACK	RRP EACH	DESCRIPTION
181030 184000	<b>&gt; SETASILK AUXILIARY PRODUCT</b> <b>Diluent</b> 45 ml bottle 250 ml bottle	316786 181030 2 316786 184000 2	5 1		 Allows the creation of clearer tones without reducing the quality of the colour nor making it more fluid.
147	<b>Water based Gutta: 20 ml tube with nozzle</b> Colourless White Gold Copper Silver Black	316786 147001 8 316786 147002 5 316786 147003 2 316786 147010 0 316786 147011 7 316786 147012 4	6		 The water based guttas have a thick consistency and are used to create outlines - the Serti technique. The colours are pearlescent. The guttas are used directly from the tube and nozzle or from a pipette and gutta nib. They flow readily into the silk fibres forming a barrier to the colour. Setasilk is applied afterwards. All the guttas can be washed after having been iron fixed with the exception of the colourless gutta which is designed to wash out leaving a white line on the fabric where it has been applied.
1471	<b>Water based Gutta: 20 ml blistered tube with nozzle</b> Colourless White Gold Copper Silver Black	316786 147101 5 316786 147102 2 316786 147103 9 316786 147110 7 316786 147111 4 316786 147112 1	6		
115000	<b>Water based Gutta: 250 ml bottle</b> Colourless	316786 115000 2	1		
194000	<b>Waxes</b> Round tjanting	316786 194000 9	1		
188000 042005 042006 042008	<b>Accessories</b> 12 Gutta applicator bottles Pen n° 5, Ø 0,20 mm Pen n° 6, Ø 0,50 mm Pen n° 8, Ø 0,90 mm	316786 188000 8 316786 042005 2 316786 042006 9 316786 042008 3	1 6 6 6		The tjanting is the traditional tool to use with wax. Used with preheated drawing wax and poured in the metal container equipped with a nozzle, the tjanting will allow you to make outlines and drawings.

SILK BAND

# OPAQUE / SHIMMER Setacolor

Opaque Setacolor colours are lively and luminous, very covering and can be used on both light and dark fabrics. Their rich texture is particularly suited to application with brush, stamps and stencils as well as screen printing. Once iron fixed, painted fabrics can be washed at up to 40°C. The Opaque Setacolor Shimmer colours are particularly spectacular! These sparkling tints give subtle glints of light which change with the movement of the light.

**SETACOLOR SHIMMERING COLOURS**

Setacolor Shimmering Opaque colours are particularly spectacular! Their rich and deep shades are glittering and have a subtle brightness with changing effects depending on the light. It is not recommended to dilute the shimmering colours in order to keep their brightness.

# TRANSPARENT Setacolor

A range of transparent colours mainly used for light coloured fabrics. Light textured, the colours in the bottle can be applied with a regular or stencil brush, without changing the flexibility and softness of the most delicate fabrics.

### More info THE SUN TECHNIQUE

Based on the heliographic technique, simply apply the diluted Setacolor Transparent colours (2 volumes of water for 1 of paint) on a damp piece of fabric. Position your stencils and expose your creation to the heat of a lamp or to the sun. The parts hidden by the patterns will be left uncoloured on the fabric!

758400	<p>&gt; <b>CASE</b></p> <p>Atelier empty case</p>	316786 758400 9	2		 <p>Storage case with multiple drawers</p>

## More info

### EXPANDABLE PAINT

Give dimension to your designs on any fabric.

Using a brush, apply Pébéo's expandable paint on an existing design drawn on your fabric:

- Use mixed with Setacolor paint to obtain pastel shades,
- Or use pure and once dry, colour with Setacolor to obtain bright shades.

Allow to dry for 30 minutes, then place the fabric on a piece of thick fabric and iron on the reverse side on silk/wool position. It takes 15 seconds for the design to expand. If you are using a thin fabric (linen, thin cotton...) the product may run through. Iron as indicated on the reverse side, but protect your design with an absorbing paper or a thicker fabric.

Once fixed, your piece can be delicately washed at 40°C (100°F).

Re-invent your textiles!

**Touch Textile** lets you “customize” your fabrics to make a fashion statement. A range of 29 colours, 6 effects and 1 glue to reinvent your decoration and your wardrobe in a glance.

**Touch Textile** is wash resistant after application and leaves the fabric with its original softness and suppleness. Create, let dry and you are ready to adapt your looks to your mood!

## Stencil cream

15 colours in tubes of 110 ml coordinated with the range Cream of Colours. The shades of both ranges contrast and complete each other. 3 lines of products for a multitude of combinations: 5 pastels colours, 5 tonic colours and 5 trendy colours. The thick consistency of the range dedicates it for creating in dimension. It presents a matt effect, and maintains a supple aspect. Very resistant, and highly covering, apply with painting knife or stencil on objects, furniture, canvasses or mural decoration. Allows to create dimensional effects with combs or effect nozzles.

## Concrete cream

15 colours in 110 ml tubes with the soft touch of smooth concrete. This range of colours finds its inspiration in nature for a refined and gentle atmosphere without contrast. A range of semi-shades offering subtle and similar shades. Use flat or in dimension. Apply with a knife on objects, furniture, canvasses and wall decorations. May also be worked with a comb for effects.

110 ml >

## Al Fresco colours

A range of colours inspired by the observation of walls aged in a period of time throughout which layers of paint have been applied one over the other. 18 colours in 150 ml jars, for a whitewashed effect, chalky finish, matt and smooth. Can be used pure or applied over a P.B.O. Deco Basic colour. Wiped, it creates an aged, patina effect on objects and small furniture. To be applied with a whitewash brush or a natural sponge.

150 ml >

## Glazing colours

A range of finishing mediums to play with transparency effects, contrasts and shades of colour. 12 satin finish colours in 150 ml jar that can be applied over an Al Fresco colour or a P.B.O. Deco Basic colour. To be used on small furniture and objects with a smoothing brush to obtain regular traces or with a natural sponge for a patina effect.

## Prisme

**NEW**  
Patented Product  
**PEBEO**  
Exclusive

PEBEO introduces **Prisme** effect colours. A range of original colours that give creations a precious and quality aspect with a professional finish.

Easy to use, the **Prisme** effect reveals itself while drying rendering unique results. The 28 **Fantasy Prisme** colours can be used in thick layer on all flat and horizontal surfaces: metal, wood, ceramic, canvas, glass, terracotta, porcelain, mirror... Solvent-based, opaque and glossy.

## More info

### FANTASY PRISME - Creating with magical effect!

- Easy to use, Prisme can be applied with a dropper, a brush or directly from the bottle on a flat and horizontal surface in thick layers.
- This product is as much adapted to a person who practices creative leisure on a regular basis than to a beginner.
- Its precious aspect is ideal to create jewellery and to decorate all types of surfaces: metal, china, terracotta, acetate, ceramic, canvas, mirrors, glass, wood... all surfaces.
- Prisme colours can be used in overlay to obtain contrasting effects.
- Fantasy Prisme colours used on wet Vitrail colours give surprising effects.
- To add a rounded effect to your creations, use the Gédéo glaze resin over very dry Prisme colours.

## More info

**FANTASY MOON** - Colours with textured, hammered and pearlescent effects.

- Easy to use: Moon is applied with a flat brush in thin or thick layers
- This product is as much adapted to a person who practices creative leisure on a regular basis than to a beginner.
- Its opalescent and pearlescent finish is ideal for the decoration of all surfaces: metal, china, terracotta, acetate, ceramic, canvas, mirrors, glass, wood... all surfaces.
- Moon colours can be mixed together.
- Fantasy Moon colours used on wet Vitrail or Ceramic colours give marbled effects.
- To add a rounded effect to your creations, use the Gédéo Glaze Resin over very dry Moon colours.

## More info

### NO-DRIP MEDIUM

The no-drip medium was created to easily mix with the Vitrail colours. It is important to mix the colours and the medium well, while avoiding the incorporation of air (do not shake). The resulting mixture allows for decorating vertical surfaces ( 50 % Vitrail colour + 50 % no-drip Vitrail medium).

- 1) 100% Vitrail Chartreuse + 0% No-drip Medium
- 2) 50% Vitrail Chartreuse + 50% No-drip Medium

1

2

# CERAMIC

Ceramic is a solvent based, opaque colour suitable for use on many surfaces: terracotta, ceramic and earthenware. This strong colour will retain its brilliance and gloss.

# PORCELAINE 150

Porcelaine 150 puts professional enamels into the hands of everyone, with 46 intermixable colours plus outliners and markers. The colours can be air dried for a decorative finish or baked in a domestic oven at 150°C for a dishwasher resistant finish. The colours are deep and brilliant, translucent and opaque and they have a superb enamelled look after baking.

## More info

### CREATION IDEA

#### Preparation of the mixture and addition of the colours:

Add 2 heaped teaspoons of thickener to 1 litre of water and stir thoroughly. Allow to rest 2 hours. Pour a 2-3 cm layer of the mixture into a plastic tub. Using the dropper, deposit the colours onto the surface of the mixture.

#### Creating marbled effects:

Allow the drops of colour to spread for a few seconds, then swirl with a wooden stick, the point of a knife or a comb until you obtain the patterns you want.

#### Colour transfer and drying:

Carefully lay the paper or fabric you want to decorate on the surface of the colouring mixture. Leave for 10 seconds before lifting it out, then rinse quickly under running water to remove the excess colour. Allow to dry flat. To fix colours on fabrics, press on the reverse side of the fabric for three minutes using an iron set on the "cotton" position.

# MODELLING, Moulding and Casting Materials

With **Gédéo**, you can easily mould and reproduce all types of object. Choose your moulding product according to the shape and consistency of the object, the casting material and the number of casts required.

The simplicity of use of the **Gédéo** moulding and casting materials offers freedom of expression in "3D".

The casting products offer a wide range of effects such as plaster, stone, glass paste.

**pébéo**

## More info

### GÉDÉO RESIN

Bottom of platters, inclusions, glazing, coating, jewellery, magnifying "effect" on canvas, furniture decoration, table settings, cards, box covers ... Pébéo offers a new range of Gédéo resins to multiply the possibilities of casting and thus meet all the expectations of consumers. A two-component epoxy resin system (resin and hardener), the Gédéo resin is easy to use : two parts resin to one part of hardener.

## > Crystal Resin

## > Casting

Product group 16

REF.	PRODUCT	BARCODE	PACK	RRP EACH	DESCRIPTION
766313	> <b>RESIN PLASTER</b> 1 kg box	359758 766313 3	6		 Top quality alpha plaster. Due to its exceptional hardness after drying, it is similar to polyester resins. It is especially recommended to mould objects requiring fineness, strength and whiteness. Professional adults.
766314	> <b>PRECISION PLASTER OR HARD PLASTER</b> 1 kg box	359758 766314 0	6		 Alpha plaster for artistic casts. It offers accuracy and strength of exceptional quality. Its coarser grain and porosity make it easy to paint. Amateur and professional adults.
766330	> <b>LIGHT PLASTER</b> 1 kg box	359758 766330 0	20		 Low density plaster recommended for casting hanging decorations. Amateur and professional adults.
766316	> <b>GLUEING PLASTER OR RESTORATION PLASTER</b> 750 g box	359758 766316 4	6		 Technical plaster. Thick and very sticky. Doesn't run and adheres to most surfaces. Used together with Siligum, it is ideal when restoring frames and mouldings.

# > Moulding

Product group 16

REF.	PRODUCT	BARCODE	PACK	RRP EACH	DESCRIPTION
766309 766329	<b>&gt; SILIGUM</b> Siligum 100 g Siligum 300 g	359758 766309 6 359758 766329 4	6 6		 Very fast setting, two-component silicone moulding paste. Easy dosing (1/1). To mould small objects and flat decorations. 100 g is sufficient to create up to 3 moulds of diameter 4 cm. Amateur and professional adults.
766310	<b>&gt; MOULDING ALGINATE</b> Moulding alginate 500 g	359758 766310 2	6		 A natural seaweed-based powder. Suitable for moulding complete items, soft or delicate objects or the human body. Amateur and professional adults.
766331 766335	<b>&gt; LATEX</b> Latex 250 ml Latex 1000 ml	359758 766331 7 359758 766335 5	1 1		 Concentrated formula based on natural rubber. It can be used to mould simple and complicated shapes, small and large thinner items and masks. Amateur and professional adults. For use with the demoulding talc
766312 766333	<b>&gt; PLASTER STRIPS</b> Plaster strips 4 strips of 8 x 300 cm Plaster strips bulk 8 x 300 cm	359758 766312 6 359758 766333 1	6 24		 They can be used to cover all types of object, produce masks by applying directly on the skin, make supporting shells for the Siligum, alginate or latex moulds. Amateur and professional adults.
766321	<b>&gt; DEMOULDING TALC</b> 15 g bottle	359758 766321 8	5		 Simplifies the demoulding of plaster and metal castings and clay embossing. It protects the moulds. Sprinkled on and dusted off the plaster decorations it produces a smooth and silky appearance. Auxiliary for latex.
766320	<b>&gt; DEMOULDING VASELINE</b> 75 ml bottle	359758 766320 1	6		 Simplifies the demoulding of Crystal Resin and protects the moulds. It can also be used to protect the eyelashes and eyebrows, before moulding the face with moulding alginate or plastered strips.

# > Modeling

Product group 16

REF.	PRODUCT	BARCODE	PACK	RRP EACH	DESCRIPTION
766304	<b>&gt; MODELLING PASTE 500 G</b> 500 g loaf	359758 766304 1	6		 Wax-based paste. Infinitely reusable to model objects or figurines you want to mould. It can also be used to take the imprint of an object to make a plaster cast. Amateur and professional adults.
766301 766302	<b>&gt; PRODUCT OF MODELLING NON-FIRING CLAY 1,5 KG LOAF</b> Red White	359758 766301 0 359758 766302 7	4 4		 Natural red, or grey clay, ready to use. Formulated with a synthetic binder, it hardens without firing. After treatment with waterproofing agent, it can be used to produce waterproof containers for non alimentary use.
766303	<b>&gt; MODELLING CLAY</b> 5 kg loaf	359758 766303 4	1		 Fine and natural white clay. Highly malleable, it is recommended for modelling, sculpture and pottery. Firing in kiln at 980°C.
766308	<b>&gt; WATERPROOFING AGENT</b> 75 ml bottle	359758 766308 9	6		 An acrylic resin-based product, it is ideal for waterproofing containers made from non-firing clay. Its yellow colour makes it easy to see areas which have not been coated. The colour disappears within a few days in full light. Transparent once dry. Drying time: 10h.
766305	<b>&gt; SELECTION MODELLING TOOLS</b> 4 modelling tools	359758 766305 8	6		 The trimming tool is used for hollowing out and digging, the modelling tool for sculpting and engraving, the rib for smoothing and cutting, and the cutting wire for clean cuts.

# CASES

The Gédéo boxed sets and moulds allow an introduction to decoration with easy and creative projects. Creation in dimension becomes accessible to all with our easy to use boxed sets. The «Memories» sets allow you to personalize and store objects that hold your most precious memories.

# CANDLES

To create a warm atmosphere on those big occasions, a dinner amongst friends, perhaps, candles are just perfect to set the scene. With the **Gédéo** range, create your own candles. For a spectacular results, mould in traditional or original shapes, plain or in several coloured layers, with fruity, woody or natural fragrances.

## Product group 16

REF.	PRODUCT	BARCODE	PACK	RRP EACH	DESCRIPTION
766221	Candle wax 500 g	359758 766221 1	6		A mixture of paraffin and stearin, this candle wax is ready to use in the form of a very fine powder, it melts quickly without lumps. 1 volume of powder = 1/2 volume of melted wax.
766222	Candle wicks N°4x5 m	359758 766222 8	6		Cotton wick suitable for candles from 65 to 85 mm diameter.
766223	Reinforced wicks 8 cm N°4x25 m	359758 766223 5	6		Waxed reinforced cotton wick, fitted on base, suitable for candles from 65 to 85 mm diameter. Regular flame, without smoke or smell.
766224	Candle colorants 6. ass colours	359758 766224 2	6		Colorants rich in pigments: just a few flakes are sufficient to obtain a deep colour. Blends in easily with Gédéo melted wax. Colours can be mixed together.
766225	Candle fragrances 3 refined scents	359758 766225 9	6		3 refined scents: woody, floral and vanilla to perfume candles. The fragrance is mixed into the melted wax before pouring into the mould. Concentrated fragrances: a few drops are sufficient.
766226	Candle mould - round	359758 766226 6	6		3 durable moulds for multiple casts. Easy demoulding.
766227	Candle mould - square	359758 766227 3	6		
766228	Candle mould - cone	359758 766228 0	6		
766230	Beeswax 5 sheets 26 x 40 cm	359758 766230 3	6		100% natural and easy to use, this wax in soft and highly malleable sheets, is perfect to invent a thousand and one candles. It is most often rolled around a wick to create circular candles of varying height and diameter.
766015	<b>&gt; ASSORTED BOX</b> "Create your own candles" case	359758 766015 6	1		Candle wax with aspect of crystallization on the surface, colorants, reinforced wicks, standard wick, perfume, 1 guide.

"Create your own  
candles" case

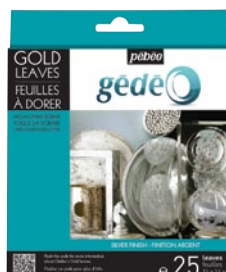

## More info

### PRO TIPS: THE CANDLES

- Highly original candles can be created by using glass containers. To demould, break the glass in a thick tea towel, giving a sharp knock on the bottom or on the side. Carefully remove the broken glass.
- To create candles in several coloured layers, pour the first colour and wait until a skin has formed (it must not stick to the fingers) before pouring on the next colour. Do not wait until each colour is completely set; since the wax shrinks as it sets, the stripes would not be clear.
- The colour tends to lighten on drying, do not hesitate to darken the colours slightly.
- The more colorant you add to the wax, the faster it will set.

# GILDS and patinas

A complete range of products from Gedeco to gild and patinate, suitable for all types of surface, wood, plaster, clay, glass, metal...

CHILDREN

Pioneer of the artistic awakening for more than fifty years, the continuous development of Pebeo relies on the spiritual heritage of Celestin Freinet: artistic awakening as a source of development and creativity for children. French pedagogue born on October 15<sup>th</sup>, 1896 in Gars in the Alpes-Maritimes and died on October 8<sup>th</sup>, 1965. Freinet is the inventor of a very rigorous pedagogy

## CHILDREN

based on innovating techniques where children were encouraged to learn by making products. Dedicated to its beliefs and thanks to a close collaboration with teachers and artists, Pebeo creates and develops educational, innovative and quality products accessible to as large a group as possible.

The sequence of this price list follows the general catalogue by product group:

# TACTILCOLOR

## FINGER PAINT

Quality Finger Paint, perfect for the very young with their first contact with the world of colour.

A thick, smooth paste which is attractive to touch and odourless. The inclusion of an agent prevents ingestion. Thanks to the **new formula**, the colours are much more lively and luminous after drying. The colours can be mixed with each other and have a better covering power. The colours dry without becoming powdery and they do not ripple the paper surface either.

*Surfaces : paper, cardboard, Bristol board etc...*

*Tools : fingers, but also rollers, paintbrushes, stamps, etc...*

*Preservation of work: Pébéo gouache water-based varnish, to be applied after colours have dried.*

*Materials, skin and clothes can be washed in soapy water.*

# TACTILCOLOR 3D BUBBLE

A Pébéo innovation for children.

The 20 light and airy Tactilcolor 3D Bubble mousse-like textured colours do not drip and allow creating in relief and modelling shapes.

Ideal for the 3D creations of young artists (3 yrs. and up).

Children can paint freely with thick and thin layers on all horizontal and vertical surfaces (except fabrics) including recyclable objects (glasses, cardboard plates, plastic bottles, etc.).

### A MULTITUDE OF POSSIBILITIES!

Creations on cardboard or plastic glasses and on plastic bottles.

Creations on wood surfaces: boxes, bracelets, napkin holders, etc.

Creations on paper, canvas boards, etc.

Creations on badges or broches

# GOUACHE cakes

Pebeo's high quality gouache cakes are unique on the market, due to its "sticky" texture which permits an easy application and dilution, even for little ones. Rich in pigments, the colours remain bright and luminous even after drying.

*To be used with a paintbrush, diluted in water. Can be used on all heavy paper, cardboard, etc...*

*Preservation of work: Pebeo water-based gouache varnish to be applied after colours have dried.*

*Materials, skin and clothes to be cleaned in soapy water.*

### More info

**MOIST GOUACHE CAKES:** a traditional manufacturing process for a high quality gouache.

This gouache is produced in accordance with Pebeo's traditional craftsmanship. The paste is mixed, finely ground and poured in cakes, which are then steamed. The manufacturing process results in moist gouache cakes, colours are easy to thin and apply, and keep their brightness after drying. A high quality product for a successful discovery of colours.

## PAINTING

# POSTER PAINT in tubes

Smooth, fine paste making application much easier. Primary colours are perfectly balanced permitting an easier understanding of mixing techniques.

**Dilution:** can be used on its own or diluted with water. Can be strongly diluted.

**Surfaces:** heavy paper, cardboard, Bristol board, wood, dough, etc...

**Tools:** brushes, rollers, etc...

**Preservation of work:** Pebeo water-based gouache varnish to be applied after colours have dried.

**Materials, skin and clothes to be cleaned in soapy water.**

# PRIMACOLOR

## Liquid

**PRIMACOLOR LIQUID IS A READY-TO-USE LIQUID GOUACHE.**

The colours are opaque and covering, they do not become chalky and remain vivid and bright after drying.

Pébéo primary colours are perfectly balanced for better learning of mixing techniques. The metallic gold and silver colours and the fluorescent colours are particularly surprising.

To be used pure or well diluted, **PRIMACOLOR LIQUID** is odourless and can be applied on heavyweight paper, cardboard, wood, salt dough.

Clean with soapy water.

# PRIMA MAGIC

Specially formulated to allow the different shades not to diffuse one into the other when mixed, this transparent tempera is also suitable for the folding technique. This paint conforms to the European toy norm. Prima Magic can be diluted with water, but loses brightness. Can be applied on paper, cardboard, wood, etc... Tools and hands can be washed with soapy water.

## MAGIC GLUE

**USED AS A GLUE :** glues all types of materials such as paper, cardboard, papier mâché, wood, etc. Can be used with the napkin technique. Renders a bright, flexible and transparent film. Drying time depends on the thickness of the application, the ambient temperature and humidity

**USED AS A MEDIUM :** can be mixed with the Prima Magic paint in all proportions to shade off the colours without losing the adherence qualities. When mixing at least 50% or more Magic Glue with 50% Prima Magic paint, you will obtain a bright and transparent Window colour that is water resistant and easy to remove on all smooth surfaces after drying for 24 hours.

Tools and hands can be washed with soapy water.

# BRILLO

## GLOSSY POSTER PAINT

Ready-to-use liquid poster, glossy after drying. For painting and decorating surfaces with a glossy finish.

Opaque colours which can be mixed together and are exceptionally glossy (lacquered effect). Smooth and fine texture.

*Dilution: not recommended as more water can result in less gloss.*

*Surfaces: paper, cardboard, dough, wood, rhodoid, etc...*

*Tools: brushes, rollers, etc...*

*No need to varnish to obtain a glossy finish, but varnishing the work will preserve it longer.*

*Materials, skin and clothes can be washed in soapy water.*

# SOLUGOUACHE

## CONCENTRATED LIQUID POSTER PAINT

Solugouache concentrate enables space to be saved. Opaque colours which cover well, there is no dust and they remain bright and luminous after drying. The Pebeo primary colours are perfectly balanced permitting a better understanding of mixing techniques. Smooth texture which makes application easier. No unpleasant smell.

**Dilution:** Dilute one volume of colour to one volume of water to obtain ready-to-use liquid poster paint. Dilute even more for transparent or watercolour effects.

**Surfaces:** heavy paper, cardboard, Bristol board, wood, dough etc...

**Tools:** brushes, rollers, stamps etc...

**Preservation of work:** Pébéo gouache water-based varnish, to be applied after colours have dried.

**Materials, skin and clothes can be washed with soapy water.**

### TIPS AND IDEAS

Solugouache enables children to learn about graphics and colours in a fun and easy way:

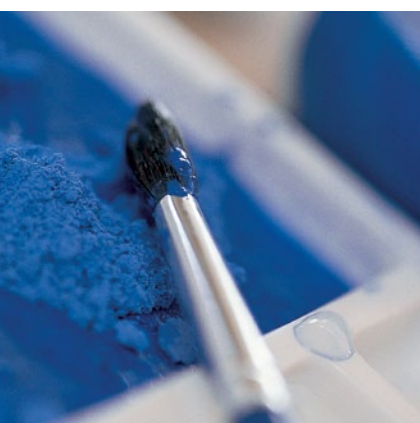

- Work flat are as with rollers, and lines and curves with paintbrushes.
- Projections with a toothbrush or a syringe.
- Prints made from fingers, lids, stoppers...

Everything is possible when a child wants to discover or experience something new.

## More info

### TIPS AND IDEAS : DRAWING GUM

The invisible fish:

- On a blank piece of paper, draw with a pencil. - Using the drawing gum, paint the outlines of the picture.
- Once the drawing gum is dry (about 15mn), cover the whole sheet of paper with poster paint (blue, for example, to represent the sea).
- Leave to dry.
- Rub the picture out with your finger. The drawing gum comes off leaving a picture of the fish.

# SPARKLING GEL

## READY TO USE SPARKLING GEL.

Coloured transparent gel composed of a large quantity of iridescent glitter. The gold, silver, bronze and copper colours are made of a transparent base, since the glitter itself gives the gold or silver its bright colour. In all the colours a multitude of glitter can be found. Once dry, the colours have a sparkly, bright finish.

*Thinner: not recommended because the addition of water will diminish the fluorescence.*

*Supports: all types of heavy paper, carboard, Bristol board, wood, dough.*

*Tools: brushes, rollers, stamps...*

*Preservation of work: Pebeo water based gouache varnish, to be applied after colours have dried.*

*Materials and skin can be washed in soapy water.*

# ARTI'STICK

## READY-TO-USE PAINT WHICH CAN BE PEELED OFF AND REPOSITIONED

Once they have dried, the Arti'Stick colours are bright and transparent. They can be mixed together but, placed next to each other, they will form a uniform film without mixing. They form a solid, supple and resistant film which means that they can be removed and replaced as often as is desired. This product contains a bitter anti-ingestion agent.

*Surfaces: all smooth and non-porous surfaces such as glass, plastic, tiles etc...*

*Application: if so desired, a model can be placed under the plastic surface (a document wallet for example).*

*Apply the colour directly onto the plastic surface using the applicator bottle. Allow to dry for 24 hours. Remove and reposition the pattern on the surface of your choice.*

*Removing stains: it is recommended that stains be removed with soapy water before the colours dry.*

## More info

### QUESTION/ANSWER : ARTI'STICK

#### Do Art'iStick colours resist the passage of time?

Yes, Art'iStick colours resist to the passage of time. They render a strong tight film and are repositionable at will.

#### Can we and must we clean the peel able paints prior to repositioning them on other surfaces to increase their adhesion?

It is not necessary to clean them but you can use a humid cloth to remove dust if desired.

# LEISURE CRAFTS

Painting on glass, porcelain, wood or even fabric...  
So many ways to introduce children to creation.

The Pebeo sets offered in smaller sizes will allow teachers to organise painting activities and to discover new techniques throughout the school year.

# WATER BASED VITRAIL

## TRANSPARENT WATER BASED COLOURS

Glossy and very solid colours which can be mixed together. They adhere perfectly to most surfaces and can be gently washed with a damp cloth.

*Surfaces:* glass or plastic but also metal and even wood for lazed effect.

*Tools:* all supple paintbrushes which have a good retention capacity. The Pébéo pony hair and pure squirrel brushes are ideal.

*Dilution :* as the product can lose some of its solidity and adhesion, dilution with water is not recommended.

*Materials and skin can be cleaned in soapy water before drying.*

#### TIPS AND IDEAS

##### Original embossed metal cards:

- Place the metal sheet onto a soft surface (blotting paper, for example).
- With a paintbrush handle, trace an outline of the drawing on the back.
- Turn the sheet of metal over and emboss the metal within the outlines of the pattern.
- Paint the pattern with water-based Vitrail colours.
- Leave to dry, then stick it onto a cardboard or Bristol board frame.

BRUSHES

For the past 10 years, Pebeo has specialised in auxiliary materials for artists, such as brushes. The brush is the extension of the artist's hand, an essential tool to which Pebeo has developed with quality and innovation.

# Brushes

## > HANDLE

This is the part of a brush on which the artist depends on to get the proper grip needed for various types of work. Traditionally, long handles are used for work in which the brush is held perpendicularly and at some distance from the canvas (oil and acrylic paints), while short handles are used for precision work (watercolour, gouache and decorative painting). Brush references such as name, size and width of brush head in millimetres are given on the handle.

## > FERRULE

The ferrule binds the hairs (brush head) to the handle. The shape of the ferrule determines the shape of the brush head, either round or flat.

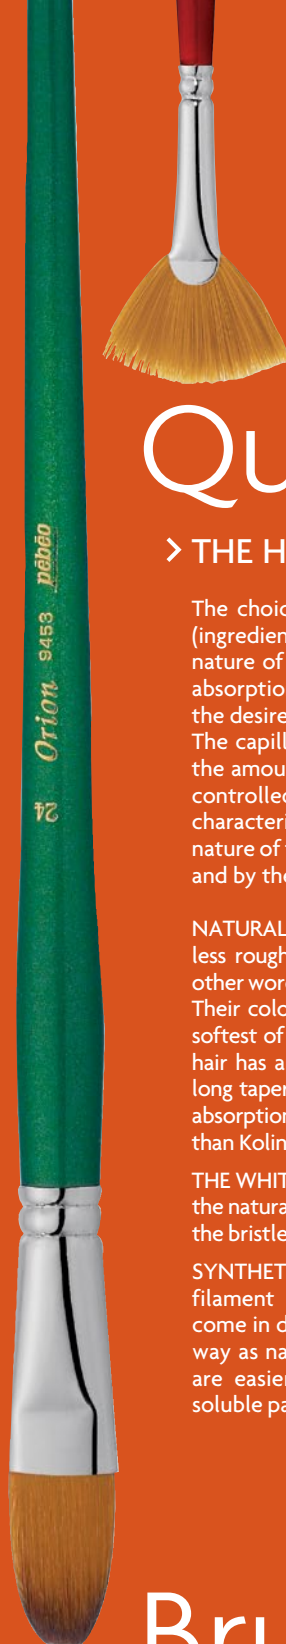

The hairs of the brush head are attached to the ferrule with glue, and the ferrule is usually fixed to the handle mechanically. The Pébéo ferrules are made of stainless steel or brass.

## > BRUSH HEAD

This is made of hairs that have been selected according to their specific physical properties, such as tension and suppleness, colour retention capacity, rigidity and thickness, and durability, all of which produce very different results.

The brush head is the soul of the brush.

The length and shape of the head determine the way the brush will behave. The shape of the head is obtained by the way the bundle of hairs is assembled, without any subsequent trimming, so as to make full use of the natural quality of the tips of the hairs.

# Quality

## > THE HAIRS

The choice of a brush depends on the paint to be used (ingredients, viscosity and cleaning solvent used), on the nature of the surface to be painted on (texture, firmness, absorption), on the technique to be used, and of course on the desired final effect.

The capillary of a hair determines its power of retention, the amount of paint it can hold. The flow of paint is then controlled by pressure exerted by the hand. The individual characteristics of a brush head are determined by the nature of the hair, which may be either natural or synthetic, and by the mixture of hairs of different diameters.

**NATURAL HAIR** tapers towards the end and has a more or less rough, scaly surface. The best hair of animal origin, in other words natural hair, comes from cold climates countries. Their colour varies according to the season. The finest and softest of all hair is pure Kolinsky sable. This relatively thick hair has an aerodynamic shape. It's main characteristic is a long tapered tip that gives it a high degree of elasticity and absorption power. Pure sable has a shorter, but harder tip than Kolinsky, which also gives it good absorption.

**THE WHITE BRISTLE** brush is ideal for working with impasto, the natural curves (curved mounted) and multiple flowers of the bristle enables the head to hold a large quantity of paint.

**SYNTHETIC FIBRES** (Cobra, Gala, Iris, etc) are single filament and conical. These recently developed fibres come in different diameters and are mounted in the same way as natural hair. They are cheaper than the latter and are easier to clean. They are recommended for water soluble paints (acrylic and watercolour) and diluted paints.

# Brush care

- > Care and sensible treatment of brushes will prolong their life! There are several simple rules. One must always make sure that paint does not dry in the brush, soak the brushes in water or essence of petroleum (for solvent based paints). For water based paints: wash the brushes after use in soap and water and make sure that no paint remains at the base of the hairs next to the ferrule. If paint has dried, wash with essence of petroleum (avoid aggressive paint strippers). For solvent based paints: wipe away excess paint with a rag, then wash the brush with essence of petroleum (avoid aggressive paint strippers) and make sure that no paint remains at the base of the hairs next to the ferrule. Afterwards rinse with warm soapy water. Dry with the hairs pointing upwards.

# Brush head shapes

## ROUND

Round brush heads are used to paint detail, using the tip of the brush; lines can be thickened by putting pressure on the brush.

## FLAT

When using a flat brush, either the full width of the brush can be used or the edge to produce finer lines. These brushes come in flat, short flat or long flat; spalters can be used in the same way.

## FILBERT

The rounded shape of the head is useful for working the kind of curves found in flower petals, leaves or birds.

## ANGULAR

The angled head is a flat brush set at an angle, making it possible to work in small spaces either using the tip or the flat edge of the head according to the desired effect.

## FAN

Fan shaped heads can be used wet or dry. When used dry it is useful to paint shaded tones. When wet, this shape can be used to produce streaked effects, as in grass or trees.

## SCRIPT LINER

The round pointed shape is used to paint details. The thickness of the stroke can be varied by the pressure applied on the head.

## LINER

The liner is used to paint very fine strokes; when the brush head is filled with paint, makes it possible to paint very long strokes.

## DAGGER STRIPPER

The dagger stripper shape is interesting in that its tip and curved brush head are useful for painting such shapes as leaves or ribbons.

## COMB

The comb is a flat brush head narrowed to a point; putting pressure on the brush broadens the stroke to the full width of the brush.

## STENCIL

The stencil brush head is used with a dabbing motion to produce shaded or fading effects; it is often used for instance for painting foliage.

## DEERFOOT STIPLER

The deerfoot stippler is a bevelled stencil shaped brush head that makes it possible to go beyond what one can do with a simple stencil. If the edge of the brush is used you can obtain fine strokes.

## OVAL

The oval shape is useful due to its rounded shape, the width of the brush head and its edge. Exerting pressure on the brush makes it possible to vary the thickness of strokes.

## MOP

The usefulness of the mop is its rounded shape and the breadth of the brush head. Applying pressure to the brush makes it possible to vary the thickness of the brush head.

Mistral curve mounted white bristle brushes are firm and springy. They retain their natural curve when paint is applied, and are particularly suited for impasto work and oil and acrylic painting.

#### DESCRIPTION

- Natural thick rooted pure curved white bristles.
- Stainless steel ferrule.
- Long handle, mahogany lacquered.
- Brush head shapes: round, short flat, flat, long flat, filbert and fan.

#### SPECIFICATIONS

- Quality: firm, robust, flexible, holds a large quantity of paint, naturally curved bristles.
- Uses: oil, acrylic, gouache and fabric paints.

The very carefully mounted curved polyamide fibres make a very firm, precision brush head. These synthetic bristle brushes are a useful alternative to white bristle (natural bristle ) brushes.

**DESCRIPTION**

- Very finely tipped, curved, polyamide fibre synthetic bristles.
- Yellow brass ferrule.
- Long handle, rosewood lacquered.
- Brush head shapes: round, short flat, flat, filbert.

**SPECIFICATIONS**

- Quality: springy, hard wearing, easy to clean, good colour retention.
- Uses: thinned oil paints, acrylics.

\* While supplies last.

This yellow polyamide fibre, a relatively new product, is springy and has an average holding capacity. It is very hard wearing and is very suitable for painting with slightly thinned oil or acrylic paints.

**DESCRIPTION**

- Synthetic bristle made of yellow polyamide fibre with very fine tips.
- Stainless steel ferrule.
- Long handle, green lacquered.
- Brush head shapes: round, bright, filbert and fan.

**SPECIFICATIONS**

- Quality: springy, hard wearing, easy to clean, good colour retention.
- Uses: thinned oil paints, acrylics.

Pure squirrel is a very soft, fine hair with great colour retention. The tip of the brush head forms a perfect point when it is wet and rounds out when the paint is applied.

### DESCRIPTION

- Pure Kazan squirrel hair, soft, very fine, shorter, full bodied brush head.
- Stainless steel ferrule.
- Short handle, black lacquered.
- Brush head shapes: round fine point and oval

### SPECIFICATIONS

- Quality: springy, silky, good colour retention, pointed.
- Uses: watercolours, washdrawings, silk paints.

**PURE SQUIRREL ROUND BRUSHES:** soft and supple, these paintbrushes are ideal for diluted applications thanks to their high retention capacity. Especially well-adapted for watercolours or ink.

**PONY HAIR BRUSHES:** less supple and more taut, they are ideal for gouache applications or for decorating surfaces.

**WHITE BRISTLE BRUSHES:** flat with a strong and toned bristle, they are an ideal tool for flat area work with liquid colours, especially for inexperienced little hands.

# LABELLING and security symbols

The 88/379/CEE establishes the classification of risks that could be present in some chemical substances included in the composition of artists products. It is regularly updated to follow the evolution of scientific knowledge. In accordance with these indications and to conform with the European legislation, the Pébéo product labels mention the security symbols and warnings relative to the potential dangers that some of our products may present.

**CE** > **CE**  
The "CE" marking is necessary for toys used by children under 14 years old. It can be affixed only if an organization notices and attests that it respects the European standards. Toy EN71-1 on the mechanical and physical characteristics. EN71-2 on flammability EN71-3 on the migration of heavy metals. If the product can present danger for children 3 years and under, it has the following note: "Not recommended for use by children under 3 years old".

 > **Easily flammable (F)**  
This symbol is affixed on products easily or very easily flammable, varnishes (bottle or spray). It is prohibited to smoke during the application of these products and must only be used in well ventilated areas.

 > **Corrosives (C)**  
Concerns the products presenting a risk of chemical burning on skin or eyes. You must wear gloves and security eye glasses.

 > **Irritant (Xi) harmful (xn)**  
The Saint-Andre cross appears on the labels of the products belonging to the harmful or irritant risk category. It concerns certain varnishes likely to cause neurological or gastric problems by inhalation, contact with skin or ingestion. You must avoid inhaling the vapours, use these products in well ventilated areas, wear gloves and carefully wash your hands with soap once finished.

 > **Dangerous for the environment (N)**  
Concerns the products that can have, in the long run, harmful effects on the environment, such as spirits. You must not throw them in sewers or in dumps where they could cause pollution.

> **Symbol that can be detected by touch**  
It is a dimensional triangle allowing blind people to be aware that they are using a dangerous product. This triangle is transparent.

 > **Safety caps**  
Products which have serious risks of intoxication if accidentally ingested are equipped with a safety cap. The cap can only be opened by applying strong pressure on it. All dangerous products must be stored away from the reach of children.

 > **ACMI**  
AP and CL are seals of the Art and Craft Material Institute of Boston (ACMI).

 The products bearing the AP seal are harmless and certified in a program of toxicological evaluation by a medical expert. They are also certified by the institute to be labelled in accordance with the ASTM D-4236 standard. The products bearing the CL seal are certified to be labelled in conformity with the toxicological evaluation program. This program is certified by the office of the toxicological institute.

> **FFFH Danish standard**  
Label A: the products can be used by children 3 years and older. This label implies that the products correspond to the strict security standards of the FFFH.

Label B: these products can be used by children 3 years and older, but under the supervision of an adult. They contain riskful substances in small quantities, so they do not completely fill under the security criteria of the FFFH standard.

Label C: these products cannot be used by children 15 years of age. They do not correspond to the FFFH standard.

Label D: these products can be used only by adults. This label implies that all the products are labelled with a 'dangerous' symbol (for example: harmful, irritant...).

 > **ECO packaging**  
This logo appearing on Pébéo's product labels attests its contribution to the treatment of wastes in collaboration with an official organization in conformity with a European legislation.

## Hazard symbols of the new system (CLP)

(Pictograms taken on the website of the United Nations Economic Commission for Europe (UNECE))

 > **I IGNITE**  
I can ignite if in contact with a flame, spark, static electricity, under the influence of heat or friction; in contact with air or water if I release flammable gases

 > **I AM CORROSIVE**  
I can materially damage or destroy metals. I damage the skin and/or eyes in the event of contact or projection

 > **I SERIOUSLY DAMAGE THE HEALTH**  
I can induce cancer. I can modify the DNA. I can impair fertility or cause harm to the fetus. I can alter the function of certain organs. I can cause mortality in the event of ingestion or penetration in the respiratory tracts. I can cause respiratory allergies (asthma for example).

 > **I AM UNDER PRESSURE**  
I can explode under the influence of heat (compressed gas, liquefied gas, dissolved gas). I can cause burns and injuries due to cold (refrigerated liquefied gas).

 > **I AFFECT THE HEALTH**  
I can poison in strong doses. I irritate the skin, the eyes and/or respiratory tracts. I can cause skin allergies, such as eczema. I can provoke drowsiness or dizziness.

 > **I POLLUTE**  
I cause harmful effects on the aquatic organism (fish, shellfish, seaweed, and other water plants...).
